

New Design Changes

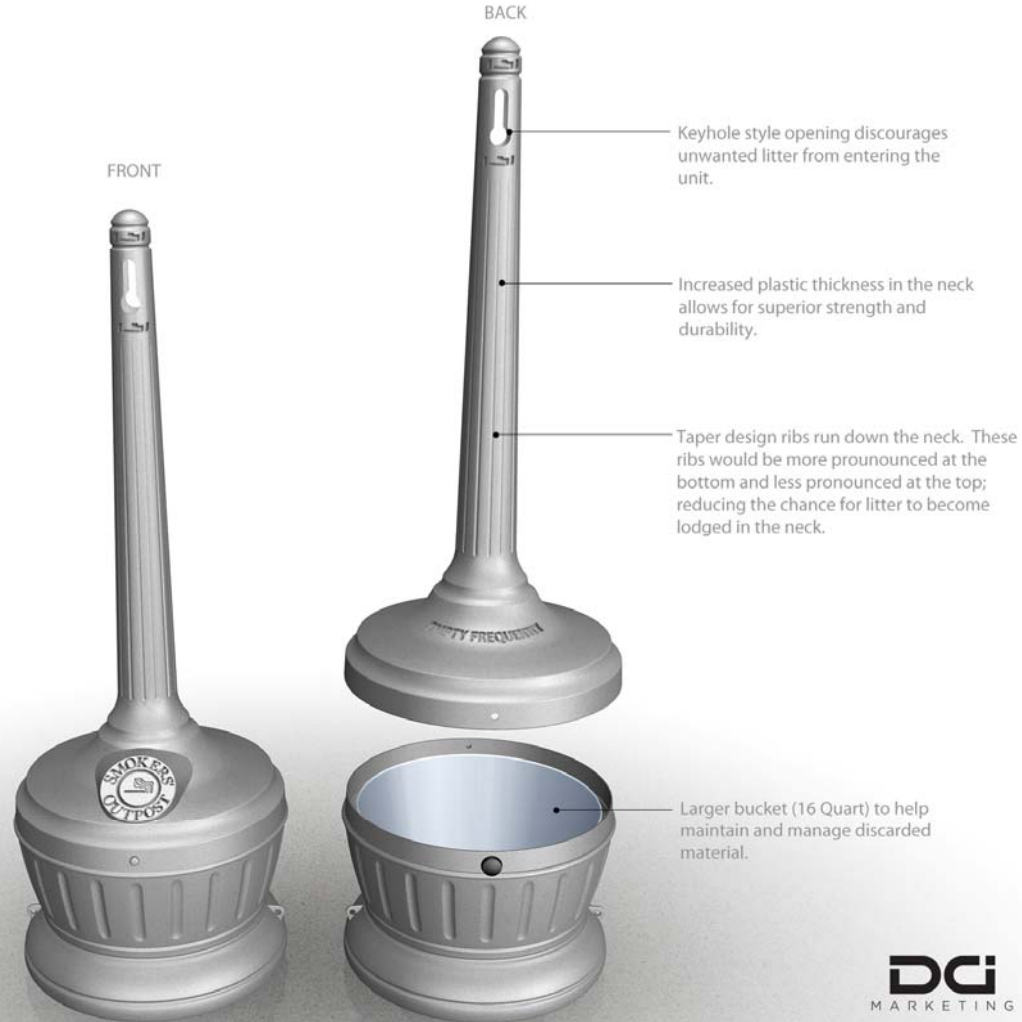

Large "Empty Frequently" is embossed onto the molded part and makes it easy to see from a distance.

The large ridge between the top and bottom reduces oxygen from entering the unit.

New & Improved Standard Smokers' Outpost

Design Changes:

- Keyhole style opening will discourag the placement of unwanted litter!
- Increased wall thickness in the neck area for superior strength and durability
- Improved neck design helps prevent unwanted litter from becoming lodged in the neck
- Larger pail to manage discarded material.
- Tighter fit in seam to reduce oxygen flow into base
- “Empty Frequently” is embossed on unit to encourage proper maintenance
